The International Community for Drymix Mortar

Category: **Set Accelerators**

As of: 12. August 2020

**Perstorp Specialty Chemicals AB** (English)
Accelerating admixture for cementitious systems (especially shotcrete) based on thiocyanate.

**Hexion Specialty Chemicals, former Momentive** (English)
Supplier of set accelerators based on alumina (Rhoximat SA 502).

**Puyang Yintai Industrial Trading Company Ltd.**
Supplier of Calcium Formate in powder form for use as a set-accelerator for drymix mortars.

**Henan Botai Chemical Building Materials, Co. Ltd.**
Manufacturer of Calcium Formate.

**Shanxi Calcrete Chemical Co., Ltd.**
Producer of calcium nitrite for use as a concrete additive. Located in China.

**Eiffel Industry sarl**
Supplier of calcium formate and sodium formate in powder form.

**Akzo Nobel Functional Chemicals bv**
Sodium thiocyanate (setting accelerator for cement).

**Dr. Paul Lohmann GmbH KG**
Manufacturer of formiates (calcium-, ammonium-, sodium-, ...) and lithium salts (tradename Lohtragon).

**BK Giulini Chemie GmbH**
Producer of sodium aluminate as setting accelerator and hardening agent for cement.

**Remondis AG (ehem. Rethmann Lippewerk GmbH)**
Sodium aluminate solutions for the production of concrete admixtures. (trademark alumin).

**SQM Inc.**
Producer of Lithium Carbonate Powders (Tradename QLithium).

**Lanxess (former Bayer Chemicals AG)**
Manufacturer of calcium formate for use as accelerator for concrete (former trade name: Mebofix).

**Yara International ASA**
Producer of a special grade of calcium nitrate for use in formulations of chloride-free set accelerating admixtures for concrete (Nitcal).

**Perstorp Polyols Inc.**
Calcium formate (technical grade, for use as concrete setting accelerator).

**Shandong Xinruida Chemical Co.**
Manufacturer of calcium formate.

**Colltec GmbH & Co. KG**
Setting accelerators for cement, based on precipitated silica and alumina.

**CG Chemikalien GmbH & Co. KG**
Distributor for chemicals, amongst others: Calcium formate.

**Harzer Gipswerke Robert Schimpf SÃ¶hne**
Finely ground calciumsulfate dihydrate as accelerator for Plaster of Paris.

**BASF Construction Solutions GmbH**
Accelerators in powder form based on crystal seeding technology (tradename HyCon S) for use in drymix mortars.

**Rockwood Lithium (former Chemetall GmbH)**
Lithium carbonate, lithium sulfate and lithium hydroxide. They act as set accelerator in mortars based on high
alumina cements (calcium aluminate cements).

Lanxess Distribution GmbH
Manufacturer of calcium formate.

Denki Kagaku Kogyo Kabushiki Kaisha (Denka Group)
Several set accelerators for cements (based on high alumina cement and calcium sulfo aluminates).

RCF Chemie + Faser GmbH
Distributor of calcium formate as set accelerator for cement. Located in Germany.

Shangyu Chemical Industry Corporation
Manufacturer of calcium formate for the use as setting accelerator of cementitious mixtures. Located in China.

FMC Corporation
Lithium carbonate-based accelerators for high-alumina cements (HAC) and alumina-portland cement blends.

Handy Chemicals Ltd.
Producer of accelerators based on aluminium compounds, especially developed for shotcrete.

Sidley Chemicals Co. Ltd.
Manufacturer of calcium formate in powder form for the setting control of concrete and drymix mortar.
